

Method®

*Create a vegetation
management program*

 **as unique as your needs**

Method® herbicide gives managers broad-spectrum control and the flexibility to manage vegetation in roadway, railway, bareground or utility corridor settings. Use Method in combination with Esplanade® for the complete bareground solution.

About Method Custom Blends

Spray programs are not all created equally – as every climate, operation and region faces unique challenges. With Method, a foundational herbicide for broadleaf and brush control, vegetation managers have the power to design a precise tool that meets the needs of their operation. This helps simplify their operation and save time and money.

Method Custom Blends offer significant management benefits

- // Improved accuracy when mixing
- // Enhanced productivity
- // Reduced labor, inventory and transportation costs
- // Opportunity to gain greater product accountability and stewardship
- // Reduced packaging and disposal

Using Method Custom Blends for flexible control

- // Build from a strong herbicide foundation for broadleaf and brush control, and add mix partners to create a custom solution
- // May be used for Individual Plant Treatments in all rights-of-way VM sites transecting grazed areas*
- // Use Method in combination with Esplanade for the complete bareground solution
- // Match your biology needs
- // Reliable in all vegetation control settings
- // Do not use within the root zone of desirable trees or vegetation; this root zone can be extended well beyond the tree canopy

*See approved label for VM use sites.
